

Ping-Heng Tan is a professor of physics at Institute of Semiconductors (IS), Chinese Academy of Sciences (CAS). He received his Bachelor degree at Peking University and PhD at University of Chinese Academy of Sciences. He was a postdoc at Walter Schottky Institute, Technical University of M^unchen, and has been at the ISCAS since 2003. He had worked at University of Cambridge as KC Wong Royal Society Fellow from 2006 to 2007. He has published 190 peer-reviewed papers with citations over 10000 times, had edited a book on "Raman Spectroscopy of Two-Dimensional Materials" and has been invited to give more than 100 invited/Keynote/Plenary talks in national and international conferences. He was awarded National Science Fund for Distinguished Young Scholar Fund, the National high-level talents special support plan, Kun Huang prize in Physics, Dayawati Rastogi Lecture Award and highly cited researcher by Web of Science, Clarivate Analytics in 2018 and 2019. Besides being a member of the International Steering Committee of ICORS, he is currently also the chairperson of the Chinese Light Scattering Committee, Member of CPS council and Member of organizing committee of CPS Fall Meeting. In addition, he is an Advisory Board member of the Journal of Raman Spectroscopy and member of Editorial boards of journals such as npj 2D Materials and Applications, Superconductor Science and Technology, Journal of Semiconductors and Journal of Light Scattering. His current interests include low-frequency Raman spectroscopy, resonance Raman spectroscopy, Raman spectroscopy of two-dimensional materials, and development of various modern Raman techniques.
